

Information Retrieval and Web Analytics

Semester 2 – 2022

Assignment 2

1. Build a web scrapper using BeautifulSoup to extract (scrape) product details (Product number, Product Name, New Price, Old Price, discount) from <https://www.guessfactory.com/us/en/sale/women/view-all> in to an excel file.

Submission format

Submit a single file containing the code. Name the file with your corresponding IT number

Ex : <it20*****.py> or <it20*****.ipynb>

Notes:

Plagiarism Rules: If your code matches (more than 50%) with another student's code, all those students whose codes match will be awarded with zero marks without any evaluation.
